PROFILE SUMMARY

B.Tech Computer Science (Data Science) student with hands-on experience in software development, machine learning, and web technologies. Built and deployed data-driven web applications using Python, Flask, and Streamlit, with strong foundations in backend logic, data processing, and problem-solving. Actively seeking opportunities to apply technical skills in real-world projects and industry environments.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering (Data Science)
GIET University, Gunupur

2023 – 2027

PROJECTS

AI-Powered Mobile Platform for Sports Talent Assessment

Jul 2025 – Oct 2025

- Developed a mobile-first platform to assess athletic performance using AI-driven video analysis and biometric data.
- Trained and evaluated machine learning models on multi-sport datasets to improve talent assessment accuracy by approximately 84%.
- Implemented computer vision techniques using OpenCV for motion and performance analysis.
- Tools & Technologies: Python, TensorFlow, OpenCV, React Native, Node.js, MySQL

SwasthAI – AI-Powered Maternal & Child Health Monitoring Platform

Sep 2025

- Built an AI-powered platform to improve maternal and child healthcare accessibility.
- Integrated a multilingual AI chatbot to provide 24x7 health guidance, scheme information, and doctor appointment booking.
- Implemented a secure telemedicine module using WebRTC for real-time consultations.
- Optimized backend APIs and request handling to reduce system response latency by ~30%.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Flask, Tailwind CSS, Gemini API

Vital Predict – Health Metrics Prediction Application

Sep 2025

- Built a web-based application to predict body health metrics using ML models.
- Designed a user-friendly interface integrated with backend prediction logic.
- Worked on real-time data input, preprocessing, and result visualization.
- Tools & Technologies: Python, Scikit-learn, Pandas, NumPy, Flask, Streamlit, HTML, CSS, Machine Learning

AltScore – Intelligent Credit Scoring System

- Developed a data-driven credit scoring system using machine learning techniques.
- Implemented classification models to evaluate user credit risk categories.
- Integrated backend logic using Python and Flask for prediction workflows.
- Applied data preprocessing, feature handling, and evaluation methods.
- Python, Scikit-learn, Pandas, NumPy, Flask, Machine Learning, MySQL, Streamlit

EXPERIENCE

Java Developer Intern

May 2025 - June 2025

Sky Skill Academy (in collaboration with IIT Guwahati)

Bhubaneswar, Odisha

- Gained hands-on experience in core Java concepts including OOP, data structures, exception handling, multithreading, and file I/O.
- Developed mini-projects applying object-oriented design, data handling, and problem-solving techniques.
- Completed guided assignments and assessments in a collaborative learning environment.

Web Developer Intern

Jul 2025 – Sep 2025

Launched Global

Bengaluru, Karnataka

- Built responsive web interfaces using HTML, CSS, JavaScript, and modern frameworks.
- Developed basic CRUD web applications by integrating frontend components with Node.js and Express.js backend logic.
- Gained practical experience with Git-based version control and web application deployment.

SKILLS

Programming Languages: Python, JavaScript, Java

Web Technologies: HTML, CSS, JavaScript

Backend Development: Flask, REST APIs, Server-side Logic

Machine Learning: Supervised Learning, Classification, Regression, Model Evaluation

Data Science: Pandas, NumPy, Data Preprocessing

Databases: MySQL, Firebase

Cloud & DevOps: AWS (Fundamentals), Docker (Fundamentals)

Tools & Platforms: Git, GitHub, Streamlit, VS Code
